SUMMARY

Seeking a web developer position, armed with a strong background in the liberal arts. Completed a MERN (MongoDB, ExpressJS, React.js, Node.js) full-stack development certificate through the University of Minnesota. Known as a total team player with a keen attention to detail, passion for problem solving, and designing streamlined applications. Looking forward to working with a group of like-minded individuals to provide users an optimal experience, and learning every step of the way.

SKILLS

- **Front End:** HTML5, CSS3, Bootstrap, JavaScript (ES5/ES6), jQuery, React.js.
- **Back End:** Node.js, npm, MySQL, Sequelize, MongoDB, Mongoose, ExpressJS.
- **Other:** Git, Heroku, Responsive design, Agile development, MVC framework, APIs, AJAX.

PROJECTS

React Google Book Search | **Application:** react-google-book-search-kb.herokuapp.com/

Repo: github.com/kbetlach/react_google_book_search

- Interfaced with the Google Books API to allow users to search for any book title or author, and save those titles and delete them, all handled with MongoDB.
- Designed the page using Bootstrap and React components and routing.
- Utilized React state and use effect to achieve final product, a full MERN stack application.

Weather Dashboard | **Application:** kbetlach.github.io/weather_dashboard/

Repo: github.com/kbetlach/kbetlach.github.io/tree/master/weather_dashboard

- Utilized the OpenWeather API to provide users with current weather conditions, and a five day forecast for any searched city.
- Worked with local storage to save user's searches into their client, and upon page reload all previously searched cities are generated as buttons for easy searching.
- Utilized Bootstrap and CSS for design, and JavaScript and jQuery for API calls and page behavior.

Chameleon Sheets | **Application:** <https://chameleon-sheets.herokuapp.com/>

Repo: https://github.com/kbetlach/chameleon_sheets

- Full stack MERN application built for teachers and paraprofessionals that streamlines the data entry and analysis of behavior for special education students.
- Group project created using agile development with personal responsibilities on the front end (React component creation and routing, student search filter using React state, export to CSV functionality).
- File structure created in the model, view, controller (MVC) framework.

EMPLOYMENT

Recon Clerk: Mississippi Market | St. Paul, MN (09/19 - Present)

- Count cash in register tills from the previous day's business while simultaneously preparing

them for the current day, requiring a vigilant attention to detail.

- Provide courteous and prompt customer service in regards to product or membership questions through clear verbal communication.
- Manage, maintain, and log all co-op membership memos and contracts in the Catapult system, keeping the database completely up to date with all member information to increase return on investment.

Inventory Coordinator: Asmodee North America | Roseville, MN (09/16 – 09/19)

- Managed nearly 30 million dollars of board game inventory located across multiple warehouses in Minnesota and across the country.
- Used Acumen, Beanstalk, and Filemaker softwares to accurately track products and organized and executed stock transfers between warehouses, shortening the length of time for the product to physically move.
- Ran the year-end physical inventory across all warehouses accurately and efficiently, providing a financial snapshot for the CFO and Accounting department for their use in budgetary processes for the upcoming fiscal year.
